

The Face of Modern Dentistry

Making the Impossible...Possible

By Laura Holloway

Dr. Beverly Rose

Family dentistry is the absolute focus for Beverly Rose, D.M.D., and her team, at Exceptional Dentistry in Melbourne. However, they do have the training and experience to go far beyond the norm for reconstructive and cosmetic dentistry as is evidenced by her very satisfied client testimonials (happily provided upon request).

"You see, the technology for materials and procedures has improved significantly in the last decade," says Dr. Rose. "New materials like stronger porcelains and resins allow dentists to restore teeth without having to use metals. The benefit of these advances is that we now have the materials and skills to create the most natural looking smiles that dentistry has ever been able to provide.

"Many times these complete Smile Makeovers can be completed in just two visits. Stained teeth can be whitened, crooked teeth straightened, broken and chipped teeth repaired and missing teeth replaced. What used to take years is now done in just a few visits."

A great smile can open many doors for the person who displays it honestly with happiness and pride. And the many clients of Exceptional Dentistry proudly demonstrate that fact every single day as their grins widen each time someone tells them what a beautiful smile they have.

If you were born with a Hollywood smile, that's great. There's no better place to keep that smile at its best than at Exceptional Dentistry in Melbourne with Dr. Beverly Rose. She and her team perform all routine dental

procedures for their clients like cleanings, X-rays, exams, fillings and crowns, but if someone's smile needs a little extra help, she has the training and experience to perform some of the most complicated reconstruction and cosmetic dental procedures known in modern dentistry.

Dr. Rose graduated from the University of Florida College of Dentistry prior to attending the Las Vegas Institute for Advanced Dental Studies (often referred to as LVI). LVI teaches doctors from all over the world the art and science of aesthetic and neuromuscular dentistry. She continues to attend LVI regularly to receive the very latest updates in dental knowledge.

If you are a regular reader of *Spacecoast Living* or *Spacecoast Business* magazines, you know that I have interviewed several of the doctor's clients and that the most common comment they make about why they love going to Exceptional Dentistry is about how well they are treated there. The entire team makes you feel welcome from the moment you walk in the door. They all have beautiful smiles themselves and use them to let you know you are among friends.

Finally, as mentioned above, the doctor's education, advanced training and experience are of course paramount; however, clients tell me that one of the other big reasons for going to this doctor is her personality. Many clients almost call her by her first name...Dr. Beverly. She is indeed a very nice person and loves what she does. It shows in her work, her office, her team and how they treat their customers. They are fun to be around, extremely knowledgeable and gentle with their touch.

The next time you encounter a fantastic natural-looking smile in the Melbourne area, give the person sporting that beautiful smile a compliment and ask him or her, "What makes you smile?" Then, watch that smile get even bigger as, the odds are, that person will tell you, "Dr. Beverly Rose of Exceptional Dentistry."

Exceptional Dentistry
Dr. Beverly Rose, DMD

The team at Exceptional Dentistry makes the consultation fun. They are excited about the work they do and are happy to show you incredible before and after photos of their clients. Dr. Rose demands excellence. This requires the most experienced and talented laboratory utilizing the best materials available today. They won't settle for less. After all, it's your smile we're talking about. It has to be durable and look great!
