***As a woman in a profession dominated by men,*** Beverly Rose, DMD of Exceptional Dentistry in Melbourne knows her strength...being a woman.

Hey, no offense intended but facts are facts. She has small hands, looks good, smells good and works her magic with a gentle touch. Did I mention she has a wonderful and caring attitude? How about a fun-loving personality? What if I just say she's awesome!

Dr. Rose's clients tell it like it is and they love her. "She is a breath of fresh air," says J.B. Watson. "I actually look forward to my appointments. Her entire team treats you like you're there for a friendly visit. I think they have fun all day long visiting with everyone. I'll never go to another dentist."

The doctor understands. "No one wants to go to the dentist," says Dr. Rose. "However, this is what I do and I love it. I enjoy seeing each of my clients every day and I like helping people. So I enter each treatment room with a smile and kind words. My clients usually respond the same way and once they seem relaxed, I gently get to work."

Dr. Rose graduated from the University of Florida College of Dentistry prior to attending the Las Vegas Institute for Advanced Dental Studies (often referred to as LVI). LVI teaches doctors from all over the world the art and science of aesthetic and neuromuscular dentistry. She continues to attend LVI regularly to receive

# Touch

the very latest updates in dental knowledge.

"I think I'll be going to school for the rest of my life," says Dr. Rose. "Dental technology and procedures change rapidly. The team and I are always taking a course somewhere. We enjoy learning what's new. Everything is geared towards the patients' comfort and material quality, and every improvement is designed to either make procedures less painful, quicker, safer, last longer or look better. All of this helps us, too."

Rick Sedgeman (pictured right), is one of Exceptional Dentistry's cosmetic dental clients. "Everyone who knows me has been astounded by the difference in my look and my attitude," says Rick. "I couldn't be more pleased. Thank you and your wonderful team Dr. Rose. I am forever grateful."

You see, the technology for materials and procedures has improved significantly in the last decade. New materials like stronger porcelains and resins allow dentists to restore teeth without having to use metal. The benefit of these

advances is that they now have the materials and skills to create the most natural looking smiles that dentistry has ever been able to provide.

Many times these complete Smile Makeovers can be completed in just two visits. Stained teeth can be whitened, crooked teeth straightened, broken and chipped teeth repaired and missing teeth replaced. What used to take years is now done in just a few visits.

Whether you need a good family dentist or someone highly qualified to improve your smile, Dr. Beverly Rose fits the bill. Call her office today to schedule your consultation. I promise...she'll be gentle.

Gold crown and amalgam fillings.

New dental technology replaces amalgam fillings with natural-looking, long lasting resin.

*Exceptional Dentistry*  
Dr. Beverly Rose, DMD

The team at Exceptional Dentistry makes the consultation fun. They are excited about the work they do and are happy to show you incredible before and after photos of their clients. Dr. Rose demands excellence. This requires the most experienced and talented laboratory utilizing the best materials available today. They won't settle for less. After all, it's your smile we're talking about. It has to be durable and look great!
